

Rosters are not posted here at this time.

To see a list of players rostered on a given team, you need the team number. All team numbers appear in the captain's phone number list at the end of each schedule.

Once you have the team number, you can go to <http://national.usta.com> and click on "Public Reports". Enter the team number and you will see a list of players.

If you log on to the site with a captain's USTA number, there will be another option, called "Administrative Reports." More informative reports are available there.

Captains will see the ratings and phone numbers of their own players, but no one else will, unless they have the captain's USTA number.
